Connect to HDW Map Data with ArcCatalog

Use the steps below to configure ArcCatalog (a component of the Esri ArcGIS software) to connect to and use the HRSA Data Warehouse (HDW) map and feature services located at https://gisportal.hrsa.gov.

STEP 1: Open ArcCatalog from the desktop. From the left-side pane in the window, choose GIS Servers to expand the list of options.

🔰 ArcCatalog - Folder Connections										
File E	Edit View	Go (Geoprocessi	ng Custo	omize Wi	indows	Help

di Add WCS Server										
6	Add WMS Server									
Ġ	🗓 Add WN	1TS Server								

STEP 2: Double-click the "Add ArcGIS Server" option.

Add ArcGIS Server	X
	This wizard guides you through the process of making a connection to an ArcGIS Server. You can create a connection to use, publish, or administer GIS services.
-> 🔃	What would you like to do? Use GIS services Publish GIS services Administer GIS server
	< Back Next > Cancel

STEP 3: Choose "Use GIS services" option and click "Next."

Server URL:	https://gisportal.hrsa.gov/server/services
	ArcGIS Server: http://gisserver.domain.com:6080/arcgis
Authentication (O	uptional)
User Name:	
Password:	
	Save Username/Password
About ArcGIS Serve	er connections
About Spatial Data	Server connections

STEP 4: Enter https://gisportal.hrsa.gov/server/services for Server URL. Skip user Name and Password. Finally, click "Finish" to create the connection in ArcCatalog.

STEP 5: Open ArcMap and click the Add Data button on the ArcMap toolbar to open the "Add Data" dialog. Pull down the "Look in" list and choose "GIS Servers" as shown below

STEP 7: Map Services are represented by the icon. Feature Services are represented by the icon.

For map services and feature services, users can either add the whole service or drill down one more level, to select individual layers. The figure below illustrates selecting the ArcGIS feature service in the HealthCareFacilities folder.

Name: Show of type:	Datasets, Layers and Results	Add

STEP 8: The screenshot below shows the the contents of available features in ArcMap after adding the CMSApprovedFacilities_FS feature service. Users may control the layers displayed in their map by selecting and unselecting the check box next to the layer name.

As the data in the data warehouse changes, the available features will also change. Each time data are updated, the change is noted on the About the Data page of the HDW website (https://data.hrsa.gov/data/about).

Note: To export from ArcMap or ArcCatalog, limit the dataset to 1,000 features or less. To download the full dataset, download the Shapefile data from the Data Downloads (https://data.hrsa.gov/data/download) page.
