

2022 Health Center Patient Survey Public Use File Disclosure

The 2022 Health Center Patient Survey public use file (PUF) **does not** include any information that identifies individuals or Health Center Program grantees. The file is designed to provide data for statistical reporting and analysis only.

Federal law requires the Health Resources and Services Administration (HRSA) to present the data in this file in a form that does not permit use of the data alone, or in combination with other available information, to identify any particular patient or health center or particular delivery site.

Therefore, by accessing the data, users agree to:

- Not use the data set alone or in combination with other data to identify any individual or grantee or otherwise link information from this file with information in another data set in a manner that includes the identity of an individual or grantee;
- Upon the request of HRSA, return, delete or otherwise permanently dispose of all copies of the data in the data set that are in their possession;
- When reporting, disclosing, or posting data from the data set, not to identify any individual or grantee; and,
- If reposting the data set or a subset of the data set, require that third-party users of the data adhere to the same conditions above.

By accessing these data, you signify your agreement to comply with the conditions stated above. Continued access to these data is dependent upon compliance with such conditions.
