Health Resources and Services Administration

United States-Mexico Border Region

Fiscal Year 2019 Investment Report

U.S. Department of Health and Human Services
Health Resources and Services Administration

THIRD ANNUAL REPORT
SEPTEMBER 2020
BACKGROUND

The United States (U.S.) - Mexico border region (border region) is defined as a unique area located within 100 kilometers (approximately 62.5 miles) on each side of the border between the U.S. and Mexico. The border region spans almost 2,000 miles across four border states in the U.S. (California, Arizona, New Mexico, and Texas) and six border states in Mexico (Baja California, Sonora, Chihuahua, Coahuila, Nuevo León, and Tamaulipas). The U.S. side of the border region is a focus area for the Health Resources and Services Administration (HRSA) based on HRSA’s mission, goals, and the large vulnerable population residing within the four U.S. border states with increasing health disparities and overall poor health status.

HRSA collaborates with the U.S. Department of Health and Human Services (HHS), Office of Global Affairs (OGA) to support activities in the four U.S. border states through an HHS cooperative agreement with the U.S.-Mexico Border Health Commission. The mission of the U.S.-Mexico Border Health Commission is to provide international leadership to optimize health and quality of life along the U.S.-Mexico border region.

HRSA works to foster a more integrated and collaborative approach to making the most of its investments on the U.S. side of the border region. This effort is aimed at gaining efficiencies, decreasing duplication, and strengthening health systems capacity.

HRSA INVESTMENTS ALONG THE BORDER

The goal of this Fiscal Year (FY) 2019 Investment Report is to identify HRSA-funded programs that improve health and reduce health disparities through access to quality services, a skilled health workforce, and innovative programs on the U.S. side of the border region. The federal funds provided to state or regional grantees who disbursed a portion of their funding positively impacted health outcomes in the border region.

All HRSA investments are on the U.S. side of the border region. HRSA funded 55 programs through 160 grantees, and 173 loans and scholarships in the 4 U.S. border states, totaling
approximately $440 million¹. Investment by HRSA’s Bureaus and Offices include the following (these are approximate figures):

- Bureau of Health Workforce invested $44 million
- Bureau of Primary Health Care invested $209 million
- Federal Office of Rural Health Policy invested $9.6 million
- Healthcare Systems Bureau invested $254,150
- HIV/AIDS Bureau invested $27 million
- Maternal and Child Health Bureau invested $149 million

Described below are programmatic highlights of the FY 2019 investments listed by HRSA’s Bureaus and Offices.

**Bureau of Health Workforce**

The Bureau of Health Workforce (BHW) invested approximately $44 million in all four U.S. border states to improve the health of underserved and vulnerable populations by strengthening the health workforce and connecting skilled professionals to communities in need. This funding was awarded through 25 programs with 45 grantees and 199 loan and scholarship recipients.

- The Advanced Nursing Education (ANE) Workforce Program supports advanced nursing education programs for registered nurses preparing to become nurse practitioners, nurse midwives, nurse anesthetists, nurse administrators, and other specialists requiring advanced education.
  - BHW funded one grantee in the U.S.-Mexico border region in Arizona.
- The ANE - Sexual Assault Nurse Examiners Program supports advanced nurse education to increase the number of Registered Nurses, Advanced Practice Registered Nurses, and

---

¹ The financial investment data are from HRSA’s Data Warehouse available at the website [https://data.hrsa.gov](https://data.hrsa.gov).
Forensic Nurses trained and certified as sexual assault nurse examiners in communities on a local, regional, or state level.

- BHW funded two grantees in the U.S.-Mexico border region, one each in Arizona and Texas.

- The Area Health Education Centers support schools of medicine or nursing to develop and enhance education and training networks within communities, academic institutions, and community-based organizations. These networks develop and maintain a diverse health care workforce, broaden the distribution of the health workforce, enhance health care quality, and improve health care delivery to rural and underserved areas and populations.

- BHW funded four grantees in the U.S.-Mexico border region, one each in Arizona, California, New Mexico, and Texas.

- The Behavioral Health Workforce Education and Training Program supports professional and paraprofessional training organizations to develop and expand the behavioral health workforce in rural and medically underserved areas who serve populations across the lifespan. The program places special emphasis on establishing or expanding internships or field placement programs in behavioral health that include interdisciplinary training for students/interns, faculty, and field supervisors to provide quality behavioral health services to communities in need.

- BHW funded four grantees in the U.S.-Mexico border region, one each in Arizona, California, New Mexico, and Texas.

- The Centers of Excellence Program supports health professions schools and other public and nonprofit health or educational entities to serve as innovative resource and education centers for the recruitment, training, and retention of underrepresented minority students and faculty.

- BHW funded one grantee in the U.S.-Mexico border region in California.

- The Children’s Hospitals Graduate Medical Education (CHGME) Payment Program supports graduate medical education in freestanding children’s teaching hospitals. CHGME helps eligible hospitals maintain GME programs to provide postgraduate training for physicians to provide quality care to children and enhance their ability to care for low-income patients. It supports the training of residents to care for the pediatric
population and enhances the supply of primary care and pediatric medical and surgical subspecialties.

- BHW funded two grantees in the U.S.-Mexico border region, one each in California and Texas.

- The Geriatric Workforce Enhancement Program supports health professions schools and health care facilities to improve health care for older people by fostering clinical training environments that integrate geriatrics and primary care delivery systems and by maximizing patient and family engagement in health care decisions. The program provides training across the provider continuum (students, faculty, providers, direct service workers, patients, families, and caregivers) focusing on training in interprofessional and team-based care and on academic-community partnerships to address gaps in health care for older adults.

  - BHW funded one grantee in the U.S.-Mexico border region in California.

- The Graduate Psychology Education Program supports schools in increasing the number and distribution of adequately trained behavioral health professionals in integrated care settings, particularly within underserved and/or rural communities by providing practice-based training experience (including stipends) for psychology students.

  - BHW funded one grantee in the U.S.-Mexico border region in New Mexico.

- The Grants to States to Support Oral Health Workforce Activities Program supports states in developing and implementing innovative programs that address oral health workforce needs in dental Health Professional Shortage Areas (HPSAs).

  - BHW funded two grantees that serve the U.S.-Mexico border region, one each in Arizona and Texas.

- The Health Career Opportunities Program supports individuals from disadvantaged backgrounds to enter a health profession through the development of academies that will support and guide them through the educational pipeline.

  - BHW funded two grantees in the U.S.-Mexico border region, one each in Arizona and California.
• The Loans for Disadvantaged Students Program makes funds available to eligible accredited U.S. health professional schools to provide long-term, low-interest rate loans to full-time, financially needy students from disadvantaged backgrounds to pursue a degree in allopathic medicine, osteopathic medicine, dentistry, optometry, podiatric medicine, pharmacy, or veterinary medicine.
  o BHW funded two grantees in the U.S.-Mexico border region in Arizona.

• The National Health Service Corps (NHSC) builds healthy communities by supporting qualified health care providers dedicated to working in areas of the U.S. with limited access to care. The NHSC seeks clinicians who demonstrate a commitment to serve at NHSC-approved sites located in HPSAs. Programs include the NHSC Scholarship Program, the NHSC Loan Repayment Program, and the Students to Service Loan Repayment Program.
  o NHSC had a field strength\(^2\) of 329 providers serving along the U.S.-Mexico border region, 126 in Arizona, 109 in California, 46 in New Mexico, and 48 in Texas.
  o BHW made 175 new awards the U.S.-Mexico border region, 62 in Arizona, 58 in California, 21 in New Mexico, and 34 in Texas.

• The Nurse Anesthetist Traineeships Program funds nursing schools to provide traineeships to increase the number of nurse anesthetists for underserved populations.
  o BHW funded one grantee in the U.S.-Mexico border region in Arizona.

• The Nurse Corps helps to build healthier communities in urban, rural, and frontier areas by supporting nurses and nursing students committed to working in communities with a critical shortage of nurses. Programs include the Nurse Corps Loan Repayment Program and the Nurse Corps Scholarship Program.
  o Nurse Corps had a field strength of 31 nurses serving along the U.S.-Mexico border region, 8 in Arizona, 11 in California, 4 in New Mexico, and 8 in Texas.

\(^2\) Field Strength includes all clinicians that are currently providing primary health care services at an NHSC-approved site.
BHW made 24 new awards in the U.S.-Mexico border region, 4 in Arizona, 11 in California, 4 in New Mexico, and 5 in Texas.

- The Nurse Education, Practice, Quality, and Retention Program addresses national nursing needs and strengthens the capacity for basic nurse education and practice under three priority areas: education, practice, and retention. The programs support academic, service, and continuing education projects to enhance nursing education, improve the quality of patient care, increase nurse retention, and strengthen the nursing workforce.
  - BHW funded one grantee in the U.S.-Mexico border region in California.

- The Nursing Student Loan Program makes funds available to participating schools to offer long-term, low-interest loans to full-time, disadvantaged students pursuing a diploma, associate, baccalaureate, or graduate degree in nursing.
  - BHW funded one grantee in the U.S.-Mexico border region in California.

- The Nursing Workforce Diversity Program supports the training of high quality, culturally competent registered nurse providers that reflect the diversity of the U.S. The program assists students from disadvantaged backgrounds who have diplomas or associate degrees become baccalaureate-prepared registered nurses, and it prepares practicing registered nurses for advanced nursing education.
  - BHW funded one grantee in the U.S.-Mexico border region in Arizona.

- The Opioid Workforce Expansion Program - Professionals Program will enhance community-based experiential training for students preparing to become behavioral health professionals with a focus on Opioid Use Disorder (OUD) and other Substance Use Disorders (SUD) prevention, treatment, and recovery services. The program provides funding for training behavioral health professionals in the provision of OUD and other SUD prevention, treatment, and recovery services in high need and high demand areas and supports the development of behavioral health faculty skills and expertise in the prevention, treatment, and recovery of patients with OUD and other SUD.
  - BHW funded two grantees in the U.S.-Mexico border region, one each in California and New Mexico.
The Preventive Medicine Residency Program funds residency programs to train residents in preventive medicine, including providing stipends for residents to defray the costs associated with living expenses, tuition, and fees.

- BHW funded one grantee in the U.S.-Mexico border region in California.

The Primary Care Training and Enhancement Program funds medical education training programs for physicians and physician assistants with the goal to improve the quantity, quality, distribution, and diversity of the primary care workforce.

- BHW funded one grantee in the U.S.-Mexico border region in Texas.

The Public Health Training Centers Program supports schools of public health and others to strengthen the public health workforce. The program provides education, training, and consultation to state, local, and tribal health departments to improve the capacity and quality of a broad range of public health personnel to carry out core public health functions by providing education, training, and consultation.

- BHW funded one grantee in the U.S.-Mexico border region in Arizona.

The Scholarships for Disadvantaged Students Program increases diversity in the health professions and nursing workforce by providing grants to eligible health professions and nursing schools for use in awarding scholarships to students from disadvantaged backgrounds who have financial need, many of whom are underrepresented minorities.

- BHW funded four grantees in the U.S.-Mexico border region, one in New Mexico and three in Texas.

The State Loan Repayment Program provides cost-sharing grants to more than 30 states to operate their own loan repayment programs. These state programs offer loan repayment to primary care providers working in HPSAs.

- BHW funded four state grantees that disbursed or used a portion of their funds for activities in the U.S.-Mexico border region, one each in Arizona, California, New Mexico, and Texas.

The State Primary Care Offices Program supports states to improve primary care service delivery and workforce availability in the state or territory to meet the needs of underserved populations.
BHW funded four state grantees that disbursed or used a portion of their funds for activities in the U.S.-Mexico border region, one each in Arizona, California, New Mexico, and Texas.

- The Teaching Health Center Graduate Medical Education Program supports new and expanded primary care medical and dental residency programs in community-based ambulatory patient care settings.
  - BHW funded two grantees in the U.S.-Mexico border region, one each in California and New Mexico.

Bureau of Primary Health Care

The Bureau of Primary Health Care (BPHC) invested over $209 million in all four U.S. border states to overcome geographic, cultural, linguistic, and other barriers to care by delivering coordinated and comprehensive primary and preventive services. This funding consisted of 3 programs with 44 grantees.

- The Health Center Program is a compilation of community-based and patient-directed organizations that deliver comprehensive, culturally competent, high-quality primary health care services. Health centers also often integrate access to pharmacy, mental health, SUD, and oral health services in areas where economic, geographic, or cultural barriers limit access to affordable health care services. Health Centers deliver care to the nation’s most vulnerable individuals and families, including people experiencing homelessness, agricultural workers, residents of public housing, and the nation’s veterans. BPHC funded 38 Health Center program awardees in the U.S.-Mexico border region, 7 in Arizona, 15 in California, 4 in New Mexico, and 12 in Texas.

- The School-Based Health Center Capital Program funded six awardees; one in New Mexico, one in Texas, and four in California, to increase access to mental health, substance abuse, and childhood obesity-related services in operational school-based health centers, by funding minor alteration/renovation projects and/or purchase of moveable equipment, including telehealth equipment.

- The Health Center Controlled Networks Program funded one awardee in California. This Program helps health centers improve quality of care and patient safety by using health information technology to reduce costs and improve care coordination.
Federal Office of Rural Health Policy

The Federal Office of Rural Health Policy (FORHP) invested approximately $9.6 million in all four U.S. border states. FORHP administers grant programs designed to build health care capacity at the local and state levels. Rural Hospital Flexibility state-based grants provide funds to improve quality for critical access hospitals. The State Offices of Rural Health (SORH) state-based grants coordinate rural health initiatives statewide.

At the local level, FORHP community-based programs encourage an evidence-based approach to population health that are replicated from one community to the next and the development of collaborative networks among rural health care providers to achieve project goals. The grants support a variety of projects each year including quality improvement initiatives for small health care providers, coordination of resources and expertise across geographic regions, and support to prevent and treat opioid overdoses. FORHP programs also provide resources promoting the use of telehealth technologies for health care delivery, education, and health information services. The funding provided to 10 grantees through nine rural health programs.

- The Medicare Rural Hospital Flexibility Program provides funding to enable states to assist critical access hospitals in maintaining economic viability and clinical quality through training and technical assistance to impact quality improvement, financial and operational improvement, population health management, and emergency management system integration.
  - FORHP funded one state grantee that disbursed or used a portion of their funds for activities in the U.S.-Mexico border region in Arizona.

- The Regional Telehealth Resource Centers provide training and support, disseminate information and research findings, promote effective collaboration, and foster the use of telehealth technologies to provide health care information and education for health care providers who serve rural and medically underserved areas and populations.
  - FORHP funded one grantee that disbursed or used a portion of their funds for activities in the U.S.-Mexico border region in Arizona.

- The Rural Health Care Services Outreach Program provides support to promote rural health care services outreach projects utilizing evidence-based or promising practice models in order to address community-specific health concerns.
  - FORHP funded one grantee in the U.S.-Mexico border region in Arizona.
• The Rural Health Network Development Program provides funding and resources to mature rural health networks that have combined the functions of its members to increase access and quality of health care in rural areas.
  o FORHP funded one grantee in the U.S.-Mexico border region in Arizona.

• The Rural Health Opioid Program provides support to rural communities to develop broad community consortiums that prepare individuals with opioid use disorder to start treatment, implement care coordination practices to organize patient care activities, and support individuals in recovery.
  o FORHP funded one grantee in the U.S.-Mexico border region in Arizona.

• The Small Health Care Provider Quality Improvement Program provides support to rural primary care providers for the planning and implementation of quality improvement activities focused on improving patient care and chronic disease outcomes using evidence-based quality improvement models that expand access to, coordinate, contain the cost of, and improve the quality of essential health care services.
  o FORHP funded one grantee in the U.S.-Mexico border region in California.

• The Rural Health Network Development Planning Program provides support to rural communities for the implementation of activities needed to plan and develop formal and integrated health care networks. This may include business plan development; community needs assessment; network organizational assessment; Strengths, Weaknesses, Opportunities, and Threats analysis; and health information technology readiness assessment.
  o FORHP funded one grantee in the U.S.-Mexico border region in Arizona.

• The Small Rural Hospital Improvement Program provides funds to rural hospitals with 49 or fewer beds for investments in hardware, software, and related training efforts. These funds act as a catalyst to assist in the adaptation to changing payment systems and movement towards value including value-based purchasing, shared savings, payment bundling, and implementation of prospective payment systems.
  o FORHP funded one state grantee that disbursed or used a portion of their funds for activities in the U.S.-Mexico border region in Arizona.
• The SORH Program enhances the rural health infrastructure by linking state and federal resources to rural communities in an effort to develop long-term solutions to rural health problems. It creates a focal point for rural health issues within each state, which shares the core functions of collection and dissemination of information, coordination of rural health activities, and provision of technical assistance.

  o FORHP funded two state grantees that disbursed or used a portion of their funds for activities in the U.S.-Mexico border region, one each in Arizona and California.

• The Telehealth Network Grant Program expands access, coordinates, and improves quality of health care services; improves and expands the training of health care providers; and expands and improves the quality of health information available for decision making to health care providers and patients and their families.

  o FORHP funded one grantee in the U.S.-Mexico border region in New Mexico.

• The Rural Communities Opioid Response Program-Planning aims to reduce the morbidity and mortality associated with opioid overdoses in high-risk rural communities by providing funds to multi-sector consortiums allowing them to plan to strengthen their organizational and infrastructural capacity to address substance use disorder/opioid use disorder prevention, treatment, and/or recovery.

  o FORHP funded four grantees across three states in the U.S.-Mexico border region; two grantees are located in Arizona, one is located in New Mexico, and one is located in Texas.

• The Rural Communities Opioid Response Program-Implementation provides funding to strengthen and expand substance use disorder/opioid use disorder prevention, treatment, and recovery service delivery in high-risk rural communities.

  o FORHP funded two grantees in the U.S.-Mexico border region in Arizona.

• The Rural Residency Planning and Development Program aims to expand the number of rural residency training programs and subsequently increase the number of physicians choosing to practice in rural areas. This program is jointly administered with HRSA’s BHW.
FORHP funded five recipients in the U.S.-Mexico border region, two in California, two in New Mexico, and one in Texas.

Healthcare Systems Bureau

The Healthcare Systems Bureau (HSB) invested approximately $254,150 in two of the U.S. border states to protect the public health and improve the health of individuals through programs that provide national leadership and direction in targeted areas.

- The Poison Control Program supports the nation’s Poison Control Centers and the services they provide. It maintains a single national toll free phone number known as the Poison Help Line that allows the public to access poison center services. The program also supports the poison center infrastructure and implements and evaluates a campaign to increase awareness of the poison centers.

  - HSB funded two state grantees that disbursed or used a portion of their funds for activities in the U.S.-Mexico border region, one each in Arizona and Texas.

HIV/AIDS Bureau

The Ryan White HIV/AIDS Program (RWHAP) serves as an important source of ongoing access to HIV medication that can enable people with HIV to live close to normal lifespans. The majority of RWHAP funds support primary medical care. A smaller but equally critical portion funds technical assistance, clinical training, and the development of innovative models of care.

HAB invested approximately $27 million in four of the U.S. border states to provide a comprehensive system of HIV care and treatment services for low-income uninsured and underserved people with HIV. HAB funded 15 grantees through five programs in the U.S.-Mexico border region, 2 in Arizona, 8 in California, 1 in New Mexico, and 4 in Texas.

- The RWHAP Part A Program provides direct financial assistance to an eligible metropolitan areas or a traditional grant area severely affected by the HIV epidemic. Grant funds assist eligible jurisdictions to develop or enhance access to a comprehensive continuum of high quality, community-based care for people with HIV and those affected by HIV who are low-income through the provision of formula, supplemental, and Minority AIDS Initiative funds.

  - HAB funded one eligible metropolitan area grantee that disbursed or used a portion of their award to fund sub-recipients located in the U.S.-Mexico border region in California.
The RWHAP Part B Program provides grants to states and U.S. territories to improve the quality, availability, and organization of HIV health care and support services. Part B grants include a base grant for core medical and support services, the AIDS Drug Assistance Program (ADAP) award, ADAP Supplemental award, the Part B Supplemental award for recipients with demonstrated need, Minority AIDS Initiative funding for education and outreach to improve minority access to medication assistance programs (including ADAP), and supplemental grants to states with “emerging communities,” defined as jurisdictions reporting between 500 and 999 cumulative AIDS cases over the most recent 5 years.

- HAB funded two grantees in the U.S.-Mexico border region, one in California, and one in Texas.

The RWHAP Part C Program provides comprehensive primary health care and support services in an outpatient setting for low-income, uninsured, and underserved people with HIV. Applicants must propose to provide counseling for individuals with respect to HIV, targeted HIV testing, medical evaluation, clinical, and diagnostic services, therapeutic measures for preventing and treating the deterioration of the immune system, and for preventing and treating conditions arising from HIV, and referrals to appropriate providers of health care and support services.

- HAB funded eight grantees in the U.S.-Mexico border region, two in Arizona, three in California, and three in Texas.

The RWHAP Part D Program provides grant funding to support coordinated and comprehensive health care services in an outpatient or ambulatory care setting for low-income, uninsured, underinsured, and medically underserved women, infants, children, and youth with HIV.

- HAB funded two grantees in the U.S.-Mexico border region, one each in California and Texas.

The RWHAP Part F Program supports several research, technical assistance, and access-to-care programs. The Special Projects of National Significance (SPNS) Program supports the demonstration and evaluation of innovative models of care delivery for hard-to-reach populations. The AIDS Education and Training Centers Program (AETCs) supports the education and training of health care providers treating people with HIV through a network of eight regional centers and three national centers. The Dental Programs provide additional funding to increase access to oral health care for people with HIV.
HIV and provide dental education and training through the Dental Reimbursement Program and the Community-Based Dental Partnership Program. The Minority AIDS Initiative provides funding to evaluate and address the impact of HIV on disproportionately affected minority populations.

- HAB funded one SPNS grantee in the U.S.-Mexico border region in California.
- HAB funded three AETCs grantees in the U.S.-Mexico border region, two in California and one in New Mexico.

**Maternal and Child Health Bureau**

The Maternal and Child Health Bureau (MCHB) invested approximately $149 million in all four U.S. border states to improve the health of America’s mothers, children, and families. MCHB funded 32 grantees through 15 programs.

- Autism Secondary Data Analysis Research Program supports secondary data analysis of existing publicly available and accessible national databases and/or administrative records to advance best practices and determine the evidence-based practices for interventions that improve the physical and behavioral health of children and adolescents with autism spectrum disorder and other developmental disabilities.
  - MCHB funded one grantee in the U.S.-Mexico border region in California.

- The Collaborative Improvement & Innovation Networks (CoIINs) are multidisciplinary teams of federal, state, and local leaders working together to tackle a common problem. Using technology to remove geographic barriers, participants with a collective vision share ideas, best practices, and lessons learned and track their progress toward similar benchmarks and shared goals. CoIIN provides a way for participants to self-organize, forge partnerships, and take coordinated action to address complex issues through structured collaborative learning, quality improvement, and innovative activities.
  - MCHB funded one grantee in the U.S.-Mexico border region in California. The grantee leads the Border States CoIIN, which convenes multilevel stakeholders across the border states to achieve one common aim: increasing early and ongoing prenatal care in communities with significant disparities in perinatal outcomes by addressing the social determinants of health.
The Emergency Medical Services for Children (EMSC) State Partnership Program provides grants to states and jurisdictions to improve the delivery and quality of pediatric emergency care within the larger EMS System by ensuring the unique needs of children are integrated and well coordinated in state emergency medical services systems.

- MCHB funded four state grantees that have used a portion of their funds for activities in the U.S.-Mexico border region, one each in Arizona, California, New Mexico, and Texas.

The EMSC State Partnership Regionalization of Care Program improves access to specialized emergency health care services to children in tribal and rural communities. The Program’s projects are establishing policies and procedures that will develop and institute an organized, preplanned, pre-event process to locally manage or immediately transport injured or critically ill children that live in geographically disadvantaged regions. The projects are also integrating telemedicine services and systems to reduce transport and increase timely access to pediatric specialists.

- MCHB funded two regional grantees that have used a portion of their funds for activities in the U.S.-Mexico border region, one each in California and New Mexico.

The Family-to-Family Health Information Center (F2F HIC) Program funds family-staffed and family-run centers in the 50 States, District of Columbia, American Samoa, Puerto Rico, Guam, the U.S. Virgin Islands, the Northern Mariana Islands, and three organizations serving tribal communities. The F2F HICs provide information, education, technical assistance, and peer support to families of children and youth with special health care needs and to health professionals who serve such families. They also ensure that families and health professionals are partners in decision making at all levels of care and service delivery.

- The F2F HIC program funded three organizations in New Mexico and one organization in Texas that used a portion of their funds for activities in the U.S.–Mexico border.

The Healthy Start Program aims to reduce disparities in infant mortality and adverse perinatal outcomes by improving women’s health, promoting quality services, strengthening family resilience, achieving collective impact, and increasing accountability through quality improvement, performance monitoring, and evaluation, in the U.S.-Mexico border region.
MCHB funded two grantees in the U.S.-Mexico border region, one each in California and in New Mexico.

- The Healthy Tomorrows Partnership for Children Program promotes access to health care for children, youth, and their families nationwide and employs preventive health strategies through innovative community-based programs. This Program supports HRSA’s goals to improve access to quality health care and services, to build healthy communities, and to improve health equity. The Program funding supports projects that provide clinical or public health services, not research projects.

  o MCHB funded one grantee that disburses or uses a portion of their funds for activities in the U.S.-Mexico border region in New Mexico.

- The Leadership Education in Neurodevelopmental and Related Disabilities Program provides interdisciplinary training to enhance the clinical expertise and leadership skills of professionals dedicated to caring for children with neurodevelopmental and other related disabilities including autism.

  o MCHB funded one grantee in the U.S.-Mexico border region in Arizona.

- The Maternal and Child Health Block Grant Program provides mothers and children (in particular those with low-income or with limited availability of health services) access to quality maternal and child health services.

  o MCHB funded four state grantees that disbursed or used a portion of their funds for activities in the U.S.-Mexico border region, one each in Arizona, California, New Mexico, and Texas.

- The Maternal and Child Health Research Network Program supports the establishment and maintenance of interdisciplinary, national, multi-site, collaborative research networks, which lead, promote, and coordinate national research activities on broad and specific fields of pediatrics and maternal and child health.

  o MCHB funded three grantees in the U.S.-Mexico border region, all in California.

- The Maternal and Child Health Field-Initiated Innovative Research Studies Program advances the health and well-being of maternal and child health populations by supporting innovative, applied, and translational intervention research studies on critical issues affecting those populations.
MCHB funded one grantee in the U.S.-Mexico border region in Texas.

- The Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program, administered by HRSA in partnership with the Administration for Children and Families supports voluntary, evidence-based home visiting for at-risk pregnant women and parents with children up to kindergarten entry. Home visiting helps prevent child abuse and neglect, supports positive parenting, improves maternal and child health, and promotes child development and school readiness. States, territories, and tribal entities receive funding through the MIECHV Program and have the flexibility to tailor the program to serve the specific needs of their communities.

- MCHB funded four state grantees that disbursed their funds to support MIECHV services in the U.S. Mexico border region, one each in Arizona, California, New Mexico, and Texas.

- The Pediatric Emergency Care Applied Research Network Program establishes and maintains a multi-institutional research network that conducts high quality, rigorous studies using pooled samples of pediatric patients to determine optimal pediatric emergency care.

- MCHB funded one grantee in the U.S.-Mexico border region in Arizona.

- The Pediatric Pulmonary Centers support interdisciplinary training of health professionals that incorporates family-centered care, a public health approach, diversity, and cultural and linguistic competence to address health disparities related to chronic respiratory conditions to improve the health status of infants, children, and youth with chronic respiratory conditions.

- MCHB funded one regional grantee that disbursed or used a portion of their funds for activities in the U.S.-Mexico border region in Arizona.

- The Universal Newborn Hearing Screening Program develops statewide comprehensive and coordinated programs and systems of care targeted towards ensuring that newborns and infants receive appropriate and timely services including screening, evaluation, diagnosis, and early intervention.

- MCHB funded one state grantee that disbursed or used a portion of their funds for activities in the U.S.-Mexico border region.
